🧠 Skills

React.js | Node.js | Next.js | Tailwind CSS |
PWA | React Native | HTML | Mobile app
development | Web app development | REST
API | Backend development | Kubernetes |
Docker | Terraform | GitHub Actions | Git |
MongoDB | Flask | AI | LLM | Microservices
Architecture | Asp.Net | WPF

🔗 Programming Languages

C# | Python | Kotlin | JavaScript | TypeScript
| Java | Swift

🔧 Tools & Platforms

Google Cloud Platform | Postman | Android
Studio | Redis | Linux | Atlassian Jira | MS
Word | MS Excel | MS PowerPoint | MS
SharePoint | Trello | MS Teams | VS Code

🌐 → Languages

English — C1 (Fluent)

German — A2 (Basic)

🎓 Education

Master of Science (M.Sc.) - Applied Computer Science

SRH Hochschule Heidelberg

04/2024 – Present | Heidelberg, Germany

- Master thesis BitBoard an AI augmented platform for project management with real time code and whiteboard collaboration

Bachelor of Science (BSCS) - Computer Science

Karachi Institute of Economics & Technology(KIET)

09/2016 – 12/2020 | Karachi, Pakistan

👛 Professional Experience

Software Development Intern

edevis GmbH

03/2025 – 08/2025 | Stuttgart, Germany

- Contributed to a WPF image annotation tool used in industrial defect detection
- Implemented drawing tools layers and overlay save and restore using C# and OpenCV
- Wrote internal docs and user guides to make onboarding easier
- Demoed features in team meetings and collected feedback for improvements

Working Student - Android & ASP.NET Developer

CardiLink GmbH

03/2022 – 03/2024 | Nürnberg, Germany

- Developed and maintained native Android apps in Kotlin and handled Play Store releases
- Built cross platform apps with Blazor and MAUI and worked on backends in C# ASP.NET MVC and Entity Framework
- Delivered REST APIs running on Kubernetes and followed testing across cloud Android iOS and IoT systems
- Worked in Agile sprints and contributed to Git and Jira workflows with product managers and engineers

Freelance Full-Stack Developer

Self-Employed / Remote Clients

09/2021 – 02/2022 | Remote

- Worked with multiple clients as a freelance full-stack developer to build web and mobile apps using React.js, Node.js, and MongoDB. Handled everything from API development.

Full-stack Developer

Technoflick Solutions (Private) Limited

10/2020 – 08/2021 | Karachi, Pakistan

- Worked on the design and development of scalable web applications using React.js, Node.js, and Express in a microservices-based architecture.

Certificates

- Ethical Hacking Course (Participation)
- Robomania 16 Robotics Workshop (Completion).
- Best Project award for Programming Fundamentals

Interests

- Artificial Intelligence for real-world applications (NLP, LLMs, image recognition)
- Learning new technologies and frameworks
- Cloud-native applications & architecture
- Photography and digital editing

Projects

A Real-Time Collaborative Code Editor

Tech Stack: React.js, Node.js, Docker, Redis, Socket.io, Microservices

- Multiple users edit and execute code with live sync and session management
- Multi language support with container based isolated execution

GKE vs GAE Cloud Deployment Comparison

Tech Stack: Google Cloud Kubernetes | Google App Engine | Artillery.io | React.js | Node.js | Python

- Set up autoscaling on GKE with HPA and cluster autoscaler and ran load tests
- Documented trade offs ease of use on GAE and flexibility and cost control on GKE for scaled workloads

Virtual Assistant Chatbot

Machine Learning: Python, TensorFlow/Keras, Scikit-learn, SVM NLP & Speech Processing: NLTK, GloVe embeddings, Speech Recognition, pyttsx3 | CustomTkinter

- Processes text and voice inputs and switches between SVM with GloVe and LSTM based on dataset size
- Uses RNNs for better contextual responses with a simple desktop UI

Blockchain Supply Chain System

Stack: Android, Kotlin, Python Flask, QR and basic blockchain

- End to end tracking that records product events to a tamper resistant ledger
- QR scanning to verify product authenticity across mobile and web apps
